

## **Call for Nominations**

### **2023 SCOSTEP DISTINGUISHED SERVICE AWARD**

This is a call for nominations for the 2023 Scientific Committee on Solar-Terrestrial Physics (SCOSTEP) Distinguished Service Award.

Recognizing the societal importance of service and dedication to SCOSTEP programs and willing to honor those participants who contribute significantly to SCOSTEP activities, the SCOSTEP Bureau instituted the Distinguished Service Award.

This award is given to recognize unique contributions to SCOSTEP activities and to realization of its programs and events. One award is nominally made biennially in odd years.

This award will recognize unique contributions to SCOSTEP science through a variety of different routes, for example through the running of programs in solar-terrestrial physics, administration of SCOSTEP, and lifetime contributions of service to SCOSTEP. Such awards may be nominated via the Bureau membership and the wider SCOSTEP community. The award decision will be made by the SCOSTEP Awards Committee and communicated to the Bureau after considering submissions.

Award nomination packages (nomination letters and nominee's curriculum vitae) for the Distinguished Service Award should be submitted to the SCOSTEP President, Prof. Kazuo Shiokawa (shiokawa[at]nagoya-u.jp) by April 15, 2023, as a single pdf file. The currently serving SCOSTEP Executive Officers and Bureau Members are not eligible for nomination.

The award decision will be made by the SCOSTEP Awards Committee (SAC) and communicated to the Bureau after considering submissions.

The award will include a medal and citation. It will also be announced in the SCOSTEP Newsletter and appear on the SCOSTEP website at <https://scostep.org/awards/>. The award ceremony will be held during the inauguration of a relevant scientific meeting.

Please consider nominating a deserving individual for this prestigious award.
